

## Difference in design, efficiency through technology

The Internet presents business with an enormous opportunity. Millions of people are already connected and the numbers are growing daily. NOLAGraphics is a dedicated web design agency whose core purpose is to enable its customers profitability through building a thorough understanding of their business to design a web site to create new, or enhance existing channels to market.

NOLAGraphics has experience working with both individuals and large corporations. Regardless of the size of your project, you will always receive personal, professional service. We can develop a site much more scalable and dynamic than a simple "static HTML" site of yesterday. We develop a fully interactive, responsive website with advanced remote administration facilities. All our work is designed to the exact specifications of even the most demanding client. Our vast array of development tools offers many solutions to complex design goals. In addition to meeting design goals, we endeavor to expand our clients' awareness of design potentials and technological advances by suggesting practical alternatives and additions to our original design whenever possible.

Above all else, we value the integrity of our work and our reputation. The best interests of our clients is the foundation of our business model. By putting our clients' interests first, we have not only grown our client base, but have retained our top clients for repeat business. The mark of successful website developers isn't whether you would use them... but whether you would use them again. We are proud of the partnerships we have forged with our clients and look forward to many years of continued service.

To fully harness the capabilities of the Internet you need a great deal of imagination and entrepreneurial spirit. NOLAGraphics' philosophy is to deliver web sites that incorporate innovative design and clear, easy navigation with real world functionality.
